| as a user | I want to be able to add a recipe based on a ingredient | So when I have a certain ingredient it doesn't go to waste | |
|-----------|--|--|----------------------------|
| as a user | I want the ingredients to add up so I don't have the same product on my shoppinglist more then once | So I have a good overview of the products i need to get | |
| as a user | I want to be able to click on a recipe that has been selected that week to see the ingredients and how to make that recipe | So I can easly see what belongs to that recipe | |
| as a user | I want to be able to see a list of the recipes for that week and cross them off ones I've made them | So i have a good overview of which recipes I still need to make | |
| as a user | I want to be able to cross things of my shoppinglist | So I can see what I already have and still need to get | |
| as a user | I want to be able the reject a recipe and get a random other recipe for that recipe | So I only cook and make what I want | |
| as a user | I want to be able to see a shopping list with all the ingredients for all the recipes for that week | So I have a good overview of what i need to buy | |
| as a user | I want to be able to specify how long recipes can take for that week (for ex. 3 of 30 min or less, 2 that don't matter) | So I don't spent to much time in the kitchen | |
| as a user | I want to be able to say how many recipes I want for the upcoming week | So I am flexible with how many recipes I have that week | |
| as a user | I want to be able to delete recipes from the database | So recipes that I no longer like don't get selected anymore | Don't delete but flag them |
| as a user | I want don't want to add a recipes that is already in the database | So I only have unique recipes | |
| as a user | I want to be able to add new recipes to the database | So I can mix up the recipes more | |

| as a user | I want to be able to make changes to recipes | So when I want to change a recipe I can | |
|-----------|--|--|--|
| as a user | I want to be able to close the page and when I reopen it, continue where I was | So I can keep track of everything | (using state in react?) |
| | | , 0 | , |
| as a user | I want to be able to see an overview of all the recipes in the database without the deleted ones | So I can keep an overview of all the recipes | So without the items with the deleted flag |
| | | | |
| as a user | I want to get a pop-up before I delete a recipe from the database | So I don't accidentally delete a recipe I want to keep | |
